

**GLIBOFIT**  
**90 Capsules**

**INHIBIT SUGAR PRODUCTION AND PROMOTE HEALTHY GLUCOSE METABOLISM\***

<b>SUPPLEMENTS FACTS</b>		
Serving Size 1 Capsule		
Servings per Container 90		
Amount per serving	% Daily Value (DV) Amount serving	Value per
<b>Gymnema extract (leaf)</b> <i>(Gymnema Sylvestre)</i>	100 mg	**
<b>Bitte Melon extract (fruit)</b> <i>(Momordica Charantia)</i>	100 mg	**
<b>Neem extract (leaf)</b> <i>(Azadirachta Indica)</i>	80 mg	**
<b>Guggul (Gum resin)</b> <i>(Commiphora Mukul)</i>	50 mg	**
<b>Jambojan extract (seed)</b> <i>(Syzygium Cumini)</i>	50 mg	**
<b>Asphaltum Exudate</b>	40 mg	**
<b>Ginge (rhizome)</b> <i>(Zingiber Officinale)</i>	40 mg	**
<b>Fenugreek extract (seed)</b> <i>(Trigonella Foenum-graecum)</i>	35 mg	**
<b>Picrorhiza extract (rhizome)</b> <i>(Picrorhiza Kurroa)</i>	30 mg	**
<b>Holy Basil extract (leaf)</b> <i>(Ocimum Sanctum)</i>	15 mg	**
** Daily Value Not Established		

**OTHER INGREDIENTS:** Sodium Benzoate (E211) & Capsule Shell: Hypromellose, Purified Water, Carrageenan & Potassium Acetate.

**PROPERTIES OF COMPONENTS:**

**Gymnema Sylvestre Leaf Extract** contains gymnemic acids that exhibit a hypoglycemic activity (lowering blood glucose levels): they stimulate the secretion of insulin by  $\beta$ -cells of the pancreas and reduce the glucose absorption in the intestine. It also contributes to the restoration of  $\beta$ -cells and exhibits a hypolipidemic effect (lowering blood lipids).

**Momordica Charantia Fruit Extract**, due to the content of insulin-like proteins, helps to reduce fasting glucose and glycosylated haemoglobin levels, and helps to increase glucose tolerance as well. It stimulates glucose utilization by peripheral tissues, thereby reducing insulin resistance.

**Azadirachta Indica Leaf Extract** exhibits hypoglycemic and hypolipidemic activities, and has antioxidant and hepatoprotective effects as well.

**Asphaltum Exudate** is a mineral-plant complex that has antioxidant, anti-inflammatory, adaptogenic (increases the body's adaptation to adverse conditions) and immunomodulatory effects.

**Picrorhiza Kurroa Rhizome Extract** contains glycosides that inhibit the activity of  $\alpha$ -amylase enzyme, reducing the breakdown of starch and other carbohydrates to glucose, lowering post-meal glucose levels. It exhibits antioxidant, cardio and hepatoprotective effects.

**Ocimum Sanctum Leaf Extract** increases insulin secretion, thereby helping to reduce blood glucose levels. Also it exhibits a lipid-lowering activity.

**Zingiber Officinale Rhizome** protects the pancreas  $\beta$ -cells, and has an antioxidant effect, thereby reducing the risk of diabetic complications.

**Commiphora Mukul Exudate** contributes to the normalization in case of carbohydrate and lipid metabolism disorders. Also it exhibits cardioprotective and neuroprotective (increasing the resistance of nerve cells to adverse events) effects.

**Syzygium Cumini Seed Extract** helps to reduce blood glucose levels by increasing the release of insulin from the pancreas  $\beta$ -cells, and by reducing the glucose absorption in the intestine.

**Trigonella foenum-graecum Seed Extract** has a hypoglycaemic effect. Also it exhibits hypolipidemic, hepatoprotective, neuroprotective and nephroprotective effects.

**RECOMMENDATIONS FOR USE:** Glibofit along with a healthy diet promotes normalization of a carbohydrate metabolism and blood sugar levels. It is recommended to follow a balanced diet with restriction of animal fat, sweets and alcohol consumption\*.

**SUGGESTED USE:** Take one (1) Capsule twice daily with water before meals.

**DURATION OF USE:** Use for 3 months.

**You need 2 packages of GLIBOFIT for the full course.**

**MANUFACTURER:**

**ANANTA MEDICARE LIMITED**
